

Nixalite® Project Case History

Project Case History

Name: Panasonic® Headquarters Building San Diego

Location: San Diego, California

Installer: Agricultural Pest Control Services
San Diego, California

Purpose: Protect the Panasonic blue color accent ledges and columns from pest bird waste. Pest starlings were making a mess of the special blue color surfaces.

Problem:

At the recently erected headquarters of Panasonic, a major concern grew in regard to the large numbers of starlings that had begun to steadily roost on the stylish ledges of the companies signature building. The increasing amount of bird droppings had become an unsightly mess and a potential health hazard.

Common Starling

An additional element of the situation involved the concern of Panasonic management that any bird control deterrent not detract from the clean graceful lines of

the architectural design, nor clash with the distinctive blue company color.

Solution:

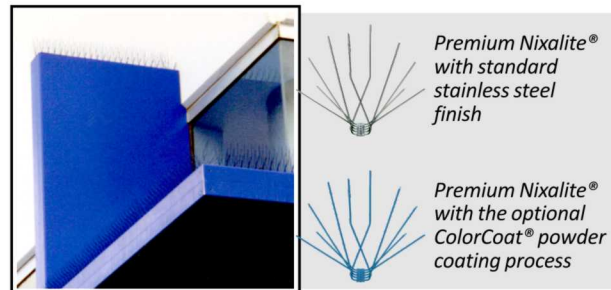

"The starlings were a definite long term concern," says Agricultural Pest Control System General Manager, Tom Oxendine. "The area is swarming with them and they loved roosting on the ledges and the tops of the blue extensions." After discussing the issues and concerns with Panasonic executives, we went to work to solve the problem.

"I knew from experience that Nixalite was the only product that would blend in with the design, stop the starlings from roosting, virtually last forever and keep costs down."

Panasonic Headquarters Building, San Diego, California

Oxendine continues; "Once Nixalite had exactly matched the distinctive blue color with its ColorCoat® process, our staff experts, who have substantial construction back ground, were able to install it. We used a single strip of Nixalite in each area."

ColorCoat option is available for all of Nixalite's stainless bird spikes

End Result:

Tom Oxendine reports that "the ColorCoat hasn't chipped or cracked, the starlings have stopped roosting although they remain in the area, and the client is extremely pleased with the results."

Summary:

The combined efforts of Agricultural Pest Control Services and Nixalite of America Inc made for a successful and inconspicuous installation. The ColorCoat option is available in several standard and custom colors. Contact Nixalite for information on all bird spike options.
