

# 35"x 16" Medium Pigeon Trap

All the best features in one simple design. This repeating pigeon trap has three one-way doors with door baffles, a shade screen and a food & water station. Each trap has two access doors (one to remove birds, one to replenish the food and water) under the shade screen and can hold 12+ pigeons at a time. Built from 14 ga. galvanized wire with a 1" x 2" mesh this pigeon trap is designed to be economical, durable and portable. Trap comes fully assembled and ready to use.

Pre-bait the problem area for several days. Once birds are used to the location, place the trap in the pre-baited area. Pre-bait the trap by tying open the one way doors so birds can move freely in and out of the trap as they eat. Apply bait in a trail that starts outside of the trap, leads in through the doors and ends with the bulk of the bait in the middle of the trap.

After acclimating to the trap, untie the doors and capture the pigeons. Make sure to inspect the trap every day. Remove the pigeons by using the top access door.

Replenish the food and water in the trap as needed. The Shade Screen helps create shelter from the elements. Do not leave birds in the trap for long periods of time.

**IMPORTANT NOTE:** Having the best trapping equipment does not guarantee trapping success. Bird and animal trapping can be as much art as it is science and you might not catch anything. Effective trapping takes careful planning, a knowledge of the target species, the correct bait, trap location and more.
