

Large Repeating Sparrow Trap

This is the largest multi-level and multi-chamber fully assembled sparrow trap available from Nixalite. Measuring 36"x24"x10", this repeating trap can hold dozens of sparrows at one time. Sparrows enter through one of the 6 one way funnel doors (3 at each end). This leads to a second chamber inside the trap where the food and water is available. A center divider creates two inner chambers where the birds are held. Use indoors or outdoors. NOTE: Do not leave the trap unattended. Inspect the trap at least once a day.

Item# SWSP3WF - Repeating Sparrow Trap

Use this large sparrow trap indoors or outdoors on an elevated platform or on any flat surface. Fasten the trap to the surface in high wind areas.

Pre-bait the area for several days. Make sure that sparrows are eating the bait before placing the trap. Position as shown; down flat with the one-way doors facing out to clear approaches. Acclimate the birds to the trap by placing the feed around the trap. Once birds are acclimated to area and the trap,

spread bait around the approaches and inside the trap. Use the majority of the bait inside the trap. Once sparrows enter, they can not exit the funnel shaped doors.

Inspect traps every day to remove trapped birds and to add bait & water as needed. If trapping in direct sunlight, create shade by partially or fully covering the trap. Do not leave birds in the trap for long periods of time.

IMPORTANT NOTE: Having the best trapping equipment does not guarantee trapping success. Bird and animal trapping can be as much art as it is science. Nixalite of America Inc guarantees the workmanship of the bird traps. WE DO NOT guarantee that you will catch anything. Effective trapping takes careful planning, a knowledge of the target species, the correct bait, trap location and more.
