

# Sweeney's® Mole & Gopher Yard Spray

WL

**Repels moles, voles and gophers and the formation of burrows, tunnels and holes caused by these pests.**

Repel moles, voles and gophers from lawns and ornamentals with Sweeney's® easy-to-use Mole & Gopher Repellent Yard Spray. The active ingredient is 100% castor oil – when soaked into soil it works to contaminate the moles underground food source (earthworms and grubs). Long-lasting, the castor oil mole repellent can be used safely around children and pets.

**Application:** To apply product, simply attach a garden hose to the self-dispensing container and adjust the nozzle to **MIX**. Turn water supply on to full pressure and spray the product over mole-infested areas. Castor oil mole repellent should be sprayed at a rate of one quart of product per 10,000 square feet (e.g. a 100 ft. by 100 ft. rectangle). After the repellent is sprayed on area to be treated, adjust the container nozzle to **WATER** and continue to spray with water to soak the product into the soil.

**When to use:** Treat all areas immediately after the presence of moles is detected. The presence of moles may be indicated by a network of surface ridges or by a series of conical mounds of earth pushed up from deep burrows. Lawns should also be treated in early Spring, mid-Summer and early Fall if there are moles nearby but not on your property.

#### Coverage:

- One quart should cover approximately 10,000 square feet.

#### For Best Results

- Apply a grubicide along with Sweeney's Mole & Gopher Repellent
- Use Sweeney's Granular Repellent along with the Yard Spray

# Sweeney's<sup>®</sup> Mole and Gopher Granular Repellent

Dual action granular repellent quickly repels moles, voles, gophers and armadillos and other burrowing animals with both scent and taste aversion.

Protect your lawn from moles, gophers, voles, armadillos and other burrowing animals with Sweeney's Mole & Gopher 2X Concentration Repellent. This powerful, dual action repellent works to repel animals by taste and smell. Made with specially engineered castor oil covered granules, the repellent penetrates soil easily to reach underground tunnels quickly. Safe and poison free, the repellent is safe to use in gardens, on grass and around children and pets.

Sweeney's mole and gopher castor oil repellent comes in convenient, re-sealable bags (4 and 10 pounds) that provides 4,000 and 10,000 square feet of coverage.

The repellent works by driving moles and other burrowing animals out of your yard and garden in stages. Avoid treating your entire lawn in one application as this will cause the unwanted pests to tunnel aimlessly in any direction to try and escape the repellent. Locate active runs or tunnels in your yard before applying Sweeney's castor oil repellent. This will enable you to establish which direction to steer burrowing animals from your yard.

Day 1 – Spread the granules over the first area and water the area with a sprinkler for roughly 20 minutes. This will allow the concentrated granules to penetrate into the ground.

Day 2 – Spread the granules over the next area; water-in this new areas as well as the Day 1 area. Continual watering allows the granules to penetrate more deeply into the ground.

Day 3 – Spread granules over the third area. Also water the same area that you did on days 1 and 2, to keep the moles moving away from your property.

Day 4 – 4th Day - Spread the granules over the fourth area. Water in the same area as days 1, 2 and 3, plus the fourth area to eliminate your mole or gopher problem and take back control of your yard.
